Government - Issued Albendazole Tablet Distribution Program

10/2/2025

The Tamilnadu Government, through the Health Department, implemented a preventive health initiative for the control of intestinal worm infections among students. As part of this initiative, Albendazole tablets were supplied to educational institutions, including colleges, for administration to enrolled students. The primary objective of the Albendazole tablet distribution program was to reduce the prevalence of parasitic worm infections among students, thereby improving their nutritional status, overall health, and academic efficiency. The Albendazole tablets were received by our college from the designated Vilisery government health authorities. Our college administration ensured proper coordination with faculty members and health personnel for effective execution of the program. Prior awareness was provided to students regarding the benefits, dosage, and safety of the medication.

During the programme, Albendazole tablets were distributed to 93 students (I & II BSc Microbiology) under the supervision of Dr. K.Nagajothi faculty and health officials. Students were briefed about the benefits of deworming, the correct method of tablet consumption, and the importance of maintaining personal hygiene. The programme was conducted smoothly and successfully achieved its objectives.

Government - Issued Albendazole Tablet Distribution Program

15/2/2024

The Tamilnadu Government, through the Health Department, implemented a preventive health initiative for the control of intestinal worm infections among students. As part of this initiative, Albendazole tablets were supplied to educational institutions, including colleges, for administration to enrolled students. The primary objective of the Albendazole tablet distribution program was to reduce the prevalence of parasitic worm infections among students, thereby improving their nutritional status, overall health, and academic efficiency. The Albendazole tablets were received by our college from the designated Vilisery government health authorities. Our college administration ensured proper coordination with faculty members and health personnel for effective execution of the program. Prior awareness was provided to students regarding the benefits, dosage, and safety of the medication.

During the programme, Albendazole tablets were distributed to 82 students (I & II BSc Microbiology) under the supervision of Dr. K.Nagajothi faculty and health officials. Students were briefed about the benefits of deworming, the correct method of tablet consumption, and the importance of maintaining personal hygiene. The programme was conducted smoothly and successfully achieved its objectives.

Government - Issued Albendazole Tablet Distribution Program

23/8/2023

The Tamilnadu Government, through the Health Department, implemented a preventive health initiative for the control of intestinal worm infections among students. As part of this initiative, Albendazole tablets were supplied to educational institutions, including colleges, for administration to enrolled students. The primary objective of the Albendazole tablet distribution program was to reduce the prevalence of parasitic worm infections among students, thereby improving their nutritional status, overall health, and academic efficiency. The Albendazole tablets were received by our college from the designated Vilisery government health authorities. Our college administration ensured proper coordination with faculty members and health personnel for effective execution of the program. Prior awareness was provided to students regarding the benefits, dosage, and safety of the medication.

During the programme, Albendazole tablets were distributed to 91 students (I & II BSc Microbiology) under the supervision of Dr. K.Nagajothi faculty and health officials. Students were briefed about the benefits of deworming, the correct method of tablet consumption, and the importance of maintaining personal hygiene. The programme was conducted smoothly and successfully achieved its objectives.
